PROFESSIONAL OVERVIEW

Full Stack Developer with 3+ years of experience building scalable web applications using .NET, React, and Azure. Skilled in end-to-end project delivery, cloud services, and event-driven architecture. Certified in Azure Fundamentals, .NET, and Generative AI. Passionate about crafting reliable, modern solutions that meet business and client needs.

WORK EXPERIENCE

Engineer

Qualitest Infotech Pvt. Ltd. | Noida, India | Apr 2023 - Aug 2025

Client: Penn Foster Inc. | USA

1. NewLeaf - LMS Connector

- Developed independently an Azure serverless .NET application to process events from Desire2Learn LMS for a user base of more than 500,000, handling 1-2 million events daily.
- Integrated Event Hub and Service Bus for data filtering and reliable message queuing, and synchronized grades with Anthology SIS.

2. AiGrading Application

- Developed from scratch using React, .NET (C#), SQL, integrating with D2L Brightspace via JavaScript injection for automatic redirection.
- Used Learnosity API for AI-based grading, allowing multiple resubmissions until students are satisfied.
- Built a workflow requiring final submission to Edugrade for manual grading.
- Phase 2.0:** Transformed the application to LTI for seamless and secure integration with D2L, while maintaining full support for previous version submissions to ensure no disruption for existing students.

3. React Frontend Application with API Integration

- Built a React frontend for managing course, lesson, and program mappings, with backend database interaction via an HTTP trigger in LMS Connector, ensuring an intuitive user interface for data updates.

4. Edugrade Application

- Modified the legacy Edugrade application to enhance usability and efficiency in grading student assignments for the NewLeaf platform.

Graduate Engineer

Qualitest Infotech Pvt. Ltd. | Noida, India | Jan 2022 - Apr 2023

Client: Penn Foster Inc. | USA

1. PFX 2.0 / UNOW - Legacy LMS Maintenance

- Maintained a Ruby on Rails application deployed on Heroku, ensuring system reliability and functionality.

2. D2L Print Application Optimization

- The D2L Print application serves as a widget within the Desire2Learn Learning Management System (LMS), enabling users to download course content in PDF format.
- Working independently, undertook a comprehensive redesign of the application to enhance its efficiency in generating PDFs.
- Performance optimizations were implemented to facilitate faster content downloads, significantly improving the application's responsiveness.

EDUCATION

MSc Software Engineering

University of Limerick, Ireland

2025 - 2026

Bachelor of Technology, IT

NIET, Greater Noida, India

2018 - 2022

SKILLS

- Azure Cloud
- .NET
- React JS
- HTML, CSS, JavaScript
- Python
- SQL

ACHIEVEMENTS

HighQ Award Winner - 2023 & 2024

Qualitest Infotech Pvt. Ltd. | India

Recognized for delivering high-quality solutions and exceeding client expectations two years in a row.

CERTIFICATIONS

Introduction to Generative AI and Prompt Engineering

June 2025

AZ-900 Microsoft Certified: Azure Fundamentals

May 2025

.NET Development - Foundation

Jan 2024
